- Replace incandescent bulbs with higher efficiency CFLs or LEDs.
- Use advanced power strips at my desk and entertainment areas.
- Enable power management settings on my computer.
- Turn off lights, electronics, and computer equipment when not in use and before leaving.
- Reduce my shower time. Every 5 minutes in the shower uses 8 gallons of water.
- Wash clothing in cold water. It uses 1/10th of the energy of washing in hot.
- Run only full loads of laundry and dishes.
