Benchmark data and the preliminary audit show that Building #1 at HSPH can quickly realize approximately $100,000 in annual energy savings. These savings could then be used to fund additional facility improvement measures at HSPH. The estimated annual savings below include the $53,106 related to the exhaust fan upgrades. The total savings represent a 6.4% annual cost savings to HSPH and are inline with other energy audits performed at this location. Exact savings and costs would be specified in a detailed technical analysis or energy audit.
