

CHECK OFF SUSTAINABILITY THIS FALL

✓ GET INVOLVED

- Get funding for your creative ideas with a Student Sustainability Grant.
- Collaborate with student leaders across Harvard's 12 Schools on the Council for Student Sustainability Leaders.
- Visit the Harvard Center for the Environment for lectures and other programs on energy and the environment.
- Apply for an internship with the Office for Sustainability.

✓ REDUCE WASTE

- With single stream recycling everything goes in one bin. Where available, compost food scraps.
- Reuse! Donate and swap unwanted office supplies, books, clothes, and other items.
- Reduce disposables by using a reusable water bottle, tote, or coffee mug.
- Bring batteries, cell phones, chargers, and CFLs to the blue E-Waste tubes.
- Join the Clean Plate Club and pledge for zero food waste.

✓ HEALTHY LIVING

- Go car-free! Bike, walk, or opt for public transit. Check out Harvard's 12 Hubway stations or track the Harvard Shuttle in real-time online.
- Eat less meat and check out the HSPH Healthy Eating Plate. The Harvard Farmers' Market runs June-October
- Use safer green cleaning supplies in your home and office. Harvard has certified green cleaning in 10 million gross square feet on campus.

✓ CONSERVE WATER

- Reduce shower time. Every 5 minutes in the shower uses 8 gallons of water.
- Run only full loads of laundry and dishes.

✓ SAVE ENERGY & WATER USE

- Turn off electronics when not in use and during vacation.
- Enable power management settings on your computer.
- Wash clothing in cold water, it uses 1/10th of the energy of washing in hot.
